EDUCATION

Bachelor of Computer Science and Engineering

Bangladesh University of Professionals (BUP) 🌐

March 2024 – Dec 2027 (Expected)

Dhaka, Bangladesh

- CGPA: 3.83 / 4.00 (up to 4th semester)

Higher Secondary Certificate (HSC)

Savar Cantonment Morning Glory School and College 🌐

2021 – 2023

Savar Cantonment, Dhaka, Bangladesh

- GPA: 5.00 / 5.00 Group: Science

Secondary School Certificate (SSC)

Savar Cantonment Morning Glory School and College 🌐

2020 – 2021

Savar Cantonment, Dhaka, Bangladesh

- GPA: 5.00 / 5.00 Group: Science

TECHNICAL SKILLS

Languages C, C++, Python, Java, JavaScript, SQL

Web Technologies HTML5, CSS3, Bootstrap, React.js

Frameworks Laravel, Node.js

Databases MySQL, PostgreSQL, SQLite

Tools & Platforms Git, GitHub, Linux, Figma

Concepts OOP, DSA, DBMS, Operating Systems, Computer Networks, Machine Learning, Deep Learning

PROJECTS

Safe Relief | 🌐 Source

Java / Android Studio

- Developed a native Android disaster relief app that finds the safest offline route to shelters or hospitals using Dijkstra's algorithm while avoiding danger zones.
- Implemented offline SMS-based SOS, supply requests, volunteer assistance, and nearest shelter detection for emergency response in flood-affected areas.

Sliceo – Pizza Ordering Website | 🌐 Source

Node.js / Express.js / CSS / JavaScript

- Developed a full-stack pizza ordering website with a responsive menu, shopping cart, checkout, and contact form using Node.js, Express, and vanilla JavaScript.
- Built RESTful APIs with JSON-based data storage for pizzas, orders, and customer messages, eliminating the need for a database.

Ecotextile Simulator | 🌐 Source

Java / Object-Oriented Programming

- Built a full-stack portfolio and trade tracking web application using Laravel, enabling users to log investment transactions and monitor performance over time.
- Designed a relational MySQL database schema for asset records and implemented dynamic frontend interactions with JavaScript for real-time portfolio updates.

- Designed a modern, responsive landing page for an AI image generation platform with a user-centered interface, gradient visuals, and clear call-to-action sections.
- Created an interactive prototype featuring reusable components, consistent typography, and a scalable design system following modern UI/UX principles.

HEDAN-HOPE (Ongoing Research)

Python | Deep Learning | Explainable AI

- Developed an explainable deep learning model for maternal vascular risk prediction using clinical data from 1,760 patients across six cohorts.
- Achieved a mean ROC–AUC of 0.9058 (cross-validation) and 0.8372 (held-out test); manuscript under faculty supervision for publication.

ACHIEVEMENTS

Top 20 Finalist — BUBT InnovateX Hackathon	2026
Outstanding Speaker — International Movement to Unite Nations (IMUN), India	2020

EXPERIENCE

Graphic Design Intern — Navie Soft	Apr 2025 – May 2025
Freelance Graphic Designer — Local Brands & Small Businesses	2024 – 2025

CO-CURRICULAR ACTIVITIES

BUP Computer Programming Club (CoPC) General Member	2026 – Present
IEEE Student Branch General Member	2026 – Present
